

Camp Math and Read for Grades 4 & 5 Cost: \$230

W7 & Week 8: July 20-July 31 (Two week program) Entering Grades: 4 5

Math: 12:30 p.m.-2:00 p.m.

Reading: 2:00 p.m.-3:30 p.m.

Maximum Enrollment per course: 6 Instructor: Eliza Spear

Achievement-oriented, these programs provide an opportunity for younger students to improve their academic skills in math and reading. Instruction is tailored to the needs of each student.

Math: Developing computation skills and understanding basic math processes are the major components of the math program. At the first class meeting, students are tested and a personalized plan is developed for each student. Upon completion, a final report is prepared that includes goals achieved and areas needing further attention.

Reading: Students learn to be active participants in the reading process while focusing on comprehension and decoding skills. The program includes: vocabulary development; book analysis and discussion; summary writing and main idea identification; conclusion; and inference skills.
