Learn how to design, code, and publish your own mobile apps and custom games! In this camp, students develop a range of different types of animated apps and games that will elevate their programming skills to the next level. This camp is a great place for new coders, but is also packed with sophisticated design tools for those students who are more advanced, too. Students will leave with several projects and create apps for any mobile device or PC that can be easily shared with friends to enjoy and play.
