

Animal Explorers & Discovering Dinosaurs

W5: July 5-July 8 (4 days only)

9:00 a.m.-12:00 p.m. Entering Grades K

First half of the week is Animal Explorers and the second half is Discovering Dinosaurs! Animal Explorers: The animals living in our backyards or in our towns are very different from the animals in other parts of the world. While some animals have adapted to live in freezing temperatures, others have adapted to live in extremely hot and dry environments. In Snapology's Animal Explorers class, students will learn where animals live and why an animal's habitat is important for survival. Through stories, games, and building animals with DUPLO blocks, your little learner will be too busy exploring biomes of the world while gaining critical social and developmental skills without even realizing it! Discovering Dinosaurs: How is a Tyrannosaurus Rex different from a Triceratops? Is it just in their physical characteristics or is it also what they ate and when they lived? In Discovering Dinosaurs, your little paleontologists will explore what dinosaurs ate and when they lived while constructing their very own dinosaur model out of DUPLO blocks. Through stories, building, and games, your little learners will be busy exploring the prehistoric world while gaining critical social and developmental skills without even realizing it!

Cost: \$230

Instructor: Snapology
