

## **We Built a Zoo**

W2: June 13-June 17 (Habitat Discovery)

W3: June 21-June 24 (Animal Discovery)

9:00 a.m.-3:30 p.m. Entering Grades 3-5

Have you ever wondered how the Denver Zoo designed Bear Mountain or the new African Penguin habitat? Are you curious how lions fare in Denver's snowy winters, or how the zookeepers ensure the hooded Capuchins don't escape from Monkey Island? If any of these questions keep you up at night, come find out! We visit the Denver Zoo, learning about different animal needs and how zookeepers take care of their animal population. Each student designs and builds their own zoo and becomes an expert on their chosen animal. The first session focuses on habitats, and the following week, we learn more about specific animals. Students can attend one or both weeks.

Cost: \$460

Instructor: Ali Kittle
